AI for Non-Coders

Vibe Engineering & Enablement

Duration	2 days
Format	Hackathon-style workshop
Prerequisites	No programming experience
Audience	Operations, administrative, and domain specialists — plus the engineers who enable them

OUTCOME

Build real working tools for your own role using conversational AI — and know when to call an engineer.

WHAT YOU'LL DO

- Build a working tool for your own role — not a toy demo — in guided hackathon sprints
- Learn the taste-tells that separate robust AI-built apps from fragile ones
- Know exactly when to stop and call an engineer instead

HOW IT RUNS

1. First ship
2. Prompting as delegation
3. Taste tells & verification
4. Own-project kickoff
5. Hackathon sprints
6. Escalation boundary
7. Demo hour
